

# 4<sup>th</sup> Critical Care Nephrology Course for Health Care Professionals (May 2010)

## Introduction

Renal Replacement Therapies (RRT) are common and crucial to critically ill patients having acute renal failure. Modes of RRT are different from those prescribed for chronic renal failure patients. The one and half day programme consisting of lectures and workshops will provide updated knowledge for the management of acute renal failure patients in Intensive Care Unit.

## Organizer

Department of Intensive Care, Pamela Youde Nethersole Eastern Hospital

## Objectives

To provide updated knowledge on critical care nephrology  
To demonstrate the operation of different RRT equipment used for different modes of therapy

## Lecturers / Facilitators

Medical and nursing experts in Intensive Care and Renal specialties from various centres

## Target Participants

Nurse, Doctors and Allied Health Professionals who are interested in Critical Care Nephrology  
Priority will be given to health care professionals who are working in Intensive Care Unit, Coronary Care Unit and Renal Unit of HA / private hospitals

## Capacity

100 (Lecture)  
80 (Workshop)

## Course Design

One day lecture (6 hours)  
Half day workshop (3 hours)
