INTENSIVE CARE MEDICINE AT YOUR FINGERTIPS

This global pandemic has thrust the specialty of Intensive Care Medicine into the spotlight. We may have had to postpone our flagship event, the 7th SG-ANZICS, but as we adapt to this new reality, we are excited to bring to you our first-ever virtual conference – the Asia-Pacific Intensive Care Symposium (APICS).

This is an entirely digital 2-day experience, showcasing the current evidence in ICU care with an overarching COVID-19 theme. We have over 10 specially designed tracks helmed by a line-up of international and local key opinion leaders in the field.

This event is available to all, absolutely free. So do register today, and we look forward to sharing the latest science with you.

KEY SPEAKERS

- Prof Yaseen Arabi
- Prof Luciano Gattinoni
- Dr Ling Li Min
- A/Prof Kenneth Mak
- Prof Jayashree Muralidharan
- Prof Paul Anantharajah Tambyah

PROGRAMME HIGHLIGHTS

- Are the ICUs prepared for COVID-19? The considerations
- ARDS management – What has changed with COVID-19?
- AKI and RRT – Can we apply that in this pandemic?
- COVID-19 and ICU – The experience in other countries
- COVID-19 pneumonia, is it like our usual ARDS?
- COVID-19 therapies – How do they affect us in the ICU
- Critical care cardiology – How has this changed with COVID-19
- Extra-corporeal blood purification therapies
- How to interpret/discern literature in times of paper influx during COVID-19
- Paediatrics in Covid-19
- Respiratory failure – Pre-COVID-19 evidence
- Severe COVID-19 and the temptation to do more
- Tele-ICU – Critical Care without walls
- What can intensivists learn from this pandemic from the infectious disease perspective?
- What happens after ICU – Implications for COVID-19 patients and healthcare workers
