Welcome Message

In conjunction with the celebration of the 45th Anniversary of the Chinese University of Hong Kong, the Advances in Medicine is scheduled for May 23-24, 2009. On behalf of the Organizing Committee, I would like to extend our warmest welcome to you to the Celebration and the Conference!

Since its first launch in 1998, the Advances in Medicine has been organized with the belief that experience sharing and cross-fertilization of knowledge are the critical ingredients to progress and advancement. It is a conference that pools expertise across different specialties and provides an ideal platform for delegates to interact and exchange with other world-class clinicians. We are pleased that our enthusiasm is shared and recognized by our medical colleagues and allied health professionals, evident by your strong support and participation. Similar to previous years, Advances in Medicine 2009 is going to cover the most recent discoveries in diagnosis and treatment: Challenges in Management of Obese Type 2 Diabetes Mellitus, New therapies for Chronic Pain and Arthritides, Advances in Management of Bleeding and Thrombosis, New Paradigms in Cancer Screening, Optimizing Control of Cardiovascular Risks, just to name a few areas. Once again, you will find the proceedings in the days to come very enriching and inspirational.

The organization of the Advances in Medicine involves myriads of complexities. Yet the valuable contribution of all speakers as well as the generous support of our industrial partners has rendered us great support and encouragement. I wish to take this opportunity to pay tribute to them. May I also express my deepest gratitude to Prof. Jack Cheng, Mr. Anthony Wu JP and Prof. Richard Yu for honoring the event with their graceful presence. It goes without saying that your active participation bears crucial importance to our success and we look forward to meeting you at the Advances in Medicine 2009!
