Course Fee: HK\$3,300, early bird enrolment (on or before 26 Nov 2014: HK\$3000)

The ADMR Provider program is a 16 hour, 2-days course which trains the participant in:

- Mass Casualty Management
- Incident Command System
- ABC's of Disaster Response
- CBRN (Hazardous material) & Decontamination
- Blast Injuries and Crush Injuries
- Psychological response to disasters
- Practical skill in environmental Injuries

Advanced Disaster Medical Response Provider (ADMR) Course

Disasters follow no rules. Traditionally, medical providers have held the erroneous belief that all disasters are different, especially those involving terrorism. In reality, all disasters, regardless of etiology, have similar medical and public health consequences. A consistent medical approach to disasters, based on an understanding of their common features and the response expertise they require, is becoming the accepted practice throughout the world. This strategy, called the Mass Casualty Incident (MCI) response, has the primary objective of reducing the mortality and morbidity caused by the disaster. The **Advanced Disaster Medical Response, Provider Course (ADMR)** is designed to train multidisciplinary medical response personnel in the basics of medical and public health disaster care, medical response to terrorism, weapons of mass destruction, specific injuries (blast, crush), environmental considerations, and special considerations such as mental health and the care of dead victims. The course, along with the

accompanying manual, was developed by the International Trauma and Disaster Institute@ Massachusetts General Hospital. The manual includes twenty-five chapters of detailed information on specific topics designed to compliment the 16-hour basic provider course.

Dr Susan Briggs graduated from Loyola University Chicago Stritch School of Medicine in 1974 and obtained an M.P.H. in International Health from the Harvard School of Public Health in 1998. She is an attending general and trauma surgeon at Massachusetts General Hospital. She is also an Associate Professor of Surgery at Harvard Medical School. Dr. Susan Briggs established and became then first director of the International Medical surgical Response Team (IMSuRT), an emergency response team, sponsored by Massachusetts General Hospital. IMSuRT, an emergency response team that, on short notice, organizes and sends teams of doctors, nurses, and other health professionals from throughout New England to emergencies around the globe.

Enquiry for application: Tel (852) 6383 0430 or Fax (852) 2680 4432 Ms Kwan.
