WELCOME MESSAGES

WFSICCM Seoul 2015
Organizing Committee

Dear Colleagues,

It is a great honor to bring your attention to the 12th Congress of the World Federation of Societies of Intensive and Critical Care Medicine in collaboration with the WFCCN and WFPICCS (WFSICCM Seoul 2015), which will be held from August 29 to September 1, 2015 in Seoul, Korea. This will be the second time the congress is held in Asia where intensive and critical care medicine has undergone a marked development over the past decades.

With its theme 'One Step Further,' the Congress will provide ample learning opportunities for practical knowledge and skills. It will be a great occasion to deepen mutual understanding between our colleagues working under diverse medico-social conditions where all medical professionals can advance a 'Step Further Together'. Over 120 renowned scholars from every continent have confirmed their participation so far and more speakers will be invited to ensure a Congress filled with rich and insightful sessions.

The WFSICCM Seoul 2015 Congress Organizing Committee is committed to making this Congress accessible to professionals from all over the world so that they may fully participate in this event and enjoy the benefits. To this end, we are offering travel grants to critical care professionals from resource-limited regions and countries. The invited physicians and nurses will join the Congress to share their knowledge and medical experiences with other professionals, and to gain new insights from renowned professionals. And this will also help promote the status of the field of intensive care medicine in the world.

The Committee promises to put its utmost effort to provide the high-quality experience of large-scale exhibitions and also enjoyable social events where you can establish a new global network. We sincerely hope that you find the new perspectives of critical care and the scientific programs presented at the congress interesting and valuable.

I look forward to your distinguished presence at the WFSICCM Seoul 2015 Congress.

Thank you.

Warmest regards,

KOH Yunsuck, M.D., Ph.D., FCCM

Chairman, WFSICCM Seoul 2015 Organizing Committee

Professor, Medicine, Medical Humanities and Social Sciences,

Department of Pulmonary and Critical Care Medicine, University of Ulsan College of Medicine

Interactive Sessions

There will be more than 100 sessions in a variety of topics in multiple formats at the Seoul congress. Many of them will be pleasantly interactive, encouraging discussions between speaker and participants and also between participants. The speakers and the organizing committee will help create a highly interactive environment where participants can casually interact with each other and delve into some unexplored areas of the field.

Experience-Oriented Workshops

A number of workshops will be organized during the main congress to help participants attend the sessions more conveniently. These sessions are designed to inspire participants to learn novel knowledge while experiencing new devices and medical technologies.

Must-Visit Exhibition

The Seoul Congress will hold a must-visit exhibition where participants can have an invaluable opportunity to experience new technologies and medical devices. It will also be an opportunity for them to obtain new skills and network with professionals of the industry. The exhibition will open on the same day the Congress opens.

Usable Knowledge

Supported physicians and nurses from resource-limited countries will obtain practically usable knowledge throughout the sessions. During the sessions such as 'Meet the Experts,' 'Panel Discussions and Workshops,' they can share with other participants and field experts medical case studies or difficulties they have faced in their countries. The shared knowledge will be beneficial to not only the supported physicians and nurses, but all the other participants attending the Congress.

BeLoved Congress

The organizing committee believes that the scientific program will help reduce the gap between countries in the critical care medicine field. Through this process, we believe the congress will establish itself as a meaningful event in critical care medicine, beloved by the world.
